The Farmer and His Needs

THE needs of the farming community have always received our careful and sympathetic consideration.

Many farmers with character and ability, but moderate capital, have received financial assistance from the Bank which has enabled them to achieve success in a way not otherwise possible.

As we have been able to help them, we may be able to help you. We invite you to call on our Manager and discuss your plans with him.

Carbon lose game at Standard Sports Saturday and lose again Sunday

For an unknown reason Carbon cannot put up as good a game of ball away from home, as they can on the local diamond.

Against Rosebud Saturday the boys were defeated 14-15. The score stood 11-14 for Carbon the last of the ninth. Rosebud with bases full drove out a home run, thus giving the locals the short end.

On Sunday, Standard, who is considered the weakest team in the league beat Carbon 15-3. Lamely had poor support, both in the infield and outfield.

CARBON LOSES AGAIN TUESDAY

It is not altogether hard luck that seems to be following the local ball players, but it's the lack of practice. There has not been a practice for the last six weeks. Perhaps now they will realize that a practice will not do them any harm.

Rosebud connected for some safe hits off of Buffin, but considering the poor support he got it would weaken the best of pitchers.

Rosebud played their usual steady game, giving their pitcher support throughout the game.

FOOTBALL

The Carbon Football team journeyed to Three Hills on Dominion Day, July 1st, and put up a very creditable exhibition against the fast Three Hills team. The game resulted in a draw 2-2. D. Sutherland scored both goals for Carbon. Owen, W. Reid, Sutherland and Fudge all played well for Carbon. Some of the boys were pretty badly crippled up in this game but will soon be around again looking for another game.

Mrs. H. Cunliffe returned to her home in Czar, after visiting her parents, Mr and Mrs Peters.

A serious accident happened last week at the Shannon mine, when a man by the name of Gorb was killed. An inquest was held by coroner Johnston, and a verdict of accidental death was rendered by the jury.

W. Avery, alias Bill Soup-kitchen, was arrested on Monday night on a charge of indecent assault on a lady in this town.

He was one of those who worked hard in order to organize a miner's union, of which he wanted to be president.

Alfy Fraser has added some more curios to his studio, in buying some Indian hand made works. We would like to suggest to Alfy to put in his museum some of our baseball players, among the fossils of pre-historic ages.

Owing to not being able to secure speakers, the District U. F. A. Sunday that was arranged for July 16th at Three Hills, will not be held this year.

Fred Morrison has purchased a radio outfit, one of the best in the market which will be installed this week by an expert.

Dept. of Agriculture

Birthday Of The Dominion

The fifty-fifth anniversary of Confederation on July 1 finds Canada enjoying fairly robust national health and, when studied in comparison with other countries, in pretty good shape financially, and its people contented and happy.

Of course, in these early after-war years, conditions in Canada, as in all countries, must be viewed in the light cast by that great world upheaval. It is impossible to fairly contrast conditions in the years before the war with those which now prevail, because the standard of comparison has in so many important respects been completely altered. When considering present-day conditions in Canada the comparison should rather be made with conditions as they are found to exist in other countries.

Applying this test to Canada on the occasion of its fifty-fifth birthday our people have good reason for satisfaction. Probably no country has suffered less during the past year from industrial turmoil and labor troubles than has the Dominion. No great national disaster occurred. While there was much unemployment during the past winter, even in this respect the Dominion presented a more favorable aspect than most countries. The returns from agriculture were not all that had been hoped for and expected, but the adverse conditions of last year have operated in certain respects to improve the outlook this year.

The operations of the past year have resulted in the Canadian dollar again reaching almost par on the United States money markets, while the credit of the Dominion has not only remained sound and strong but has improved. The deficit on the National Railways has been substantially reduced, and although there is still a long road to travel before earnings will overtake all costs of operation, maintenance and interest charges, gratifying progress towards that goal has been recorded.

As a national birthday gift, too, comes the definite assurance of a substantial reduction in freight rates, a reduction which will certainly give an impetus to business generally and which will, we confidently predict, prove advantageous to the railways themselves.

At this anniversary time, however, while rejoicing because of the many blessings which the people of Canada enjoy, every patriotic citizen should also give serious heed and thought to the needs of their Dominion, the dangers which confront it, and the duty of the individual in the circumstances.

It would be foolish to seek to disguise the fact that the national debt of over two and a quarter billions of dollars, not to speak of Provincial, Municipal and School debts, is a heavy load for less than eight million people to carry. Not only must the interest charges on that stupendous sum of money be met, but an effort must be made to reduce the principal sum from year to year until it is brought to a level where it can be carried without constituting a burden and an ever present obstacle to the inauguration of enterprises essential to the continued betterment and progress of the country.

There is only one way in which this burden of debt can be carried and removed, and that is through taxation, and the people of Canada must, therefore, be prepared to pay heavy taxes for many years to come. It is their contribution to the peace and personal liberty they enjoy; it is one of the duties of citizenship which they must ungrudgingly discharge. And heavy though these taxes may be, they are light in Canada when placed in comparison with what the people of most countries throughout the world today are called upon to pay.

But there is only one way in which taxes can be paid, and that is through the industry and labor of the people—not a portion of the population, but all the people. Wealth is not produced through the process of printing bank bills. If it were, Russia would be the richest country in the world today, instead of being in a state of poverty and internationally bankrupt. Finely engraved bank bills are merely the outward evidence of wealth created through labor, and represented by these bills for convenience in transacting the business of the world. It is through labor, and labor alone, that wealth is produced, and it is vitally important for Canada, and for each and every Canadian citizen to become thoroughly seized of that fact and conduct themselves accordingly.

On this anniversary of Confederation, each citizen of Canada might well resolve to make their country a birthday present, and no present could be more acceptable, or more far-reaching in its beneficial results not only to the Dominion as a whole but to each individual calling Canada "home," than a determination, expressed or unexpressed, on the part of all citizens to make Canada's new year one of hard, conscientious productive work. Nothing will more surely start all the wheels of business and national activity revolving more rapidly, nothing will more quickly bring about a new era of prosperity, and nothing less will suffice to relieve Canada of its greatest danger—its unduly large national debt.

WARNING! Say "Bayer" when you buy Aspirin.

Unless you see the name "Bayer" on tablets, you are not getting Aspirin at all. Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds	Headache	Rheumatism
Toothache	Neuralgia	Neuritis
Earache	Lumbago	Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoc-aceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

A Fatal Temperature

Soldier's Scheme to Stay in Hospital Did Not Work

A convalescent soldier, who was so comfortable in the hospital he hated the idea of leaving it, thought of a plan to prolong his stay. While his nurse's back was turned he removed the clinical thermometer she had placed in his mouth and held it for a few moments against the register. The nurse, returning to him, looked at the thermometer, but never blinked an eye. She merely murmured, "Poor fellow!" and went off to make her report.

Later she came back and announced that the patient was leaving that day. "But nurse," he protested, "my temperature was away up this morning."

"I know," she replied calmly, "up to 140. That's why they're moving you—you're dead."—The Veteran.

YOUNG LADIES, READ THIS

If you are bothered with pimples, rashes and ugly blotches on your face, if your complexion is sallow, it's an evidence that you require Dr. Hamilton's Pills to tone up the blood. One of these splendid regulating pills makes a complexion like peach bloom—cheeks soon become rosy, eyes brighten, you again look the picture of health, look and feel well because you use Dr. Hamilton's Pills of Mandrake and Butternut, 25c at all dealers or The Catarrhzone Co., Montreal.

Exports to Belgium

During the past fiscal year Canada exported to Belgium commodities to the value of \$40,000,000. Of this sum about seven-eighths represents the value of wheat exported; \$2,000,000 cheese; \$2,000,000 asbestos; \$270,000 flax; \$200,000 canned fish; and the balance barley, concentrated milk, rye, etc. According to the Canadian Trade Commissioner in Belgium there is a good market in that country for Canadian cattle on the hoof, flour, pulp and furs.

Judge.—Pat, the evidence shows that you hit this man twice."

Pat.—"I did not, y'r Honor. The first time I hit him I missed him."

WORDS OF PRAISE FOR "BABY'S OWN TABLETS"

No medicine receives such great praise from thankful mothers as do Baby's Own Tablets. Once a mother has used them for her little ones she will use nothing else. The Tablets are a mild but thorough laxative. They regulate the bowels and stomach; drive out constipation and indigestion; relieve colds and simple fevers; promote healthful sleep and make teething easy. Concerning them Mrs. Omer LeBlond, Maddington Falls, Que., writes:—"I am well satisfied with Baby's Own Tablets and will always use them for my little ones." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville Ont.

To Help Farmers

Manitoba Government Raising Additional Funds for Loans to Farmers

Announcement has been made by Hon. Edward Brown, Provincial Treasurer of Manitoba, that arrangements have been made by the Government for the Manitoba Farm Loans Act for raising an additional \$1,000,000, solicitation. Lachlan MacNeil, chairman of the Farm Loans Board, informed Mr. Brown that there was an overdraft of \$465,000 for loans already made and approved applications amounting to \$430,000 from farmers of the province needing immediate assistance. The treasurer called a meeting of the provincial cabinet and arranged the flotation of a \$1,000,000, three-year, five per cent. province of Manitoba loan, which was sold to the Dominion Securities Corporation for 98.70. The same firm purchased \$2,934,000 worth of Manitoba three-year, five per cent. bonds at the same price.

Services to Bermuda

A passenger and freight service between Montreal, Canada, and Hamilton, Bermuda, with a sailing from Montreal every three weeks is to be inaugurated at once by the Canadian Government Merchant Marine Limited. The first ship to leave on this service will be the Canadian Fisher, which will be followed by the Canadian Forester.

Animals Seek Place to Die

Prospector Explains Why Remains Are Found in Underground Caves

Harry Wigg, a prospector well known in the Transvaal and Rhodesia, offers a remarkable explanation of the finding of the remains of wild animals in underground caves.

He maintains that the same call that sets wild life migrating sends these creatures to a known goal when they know their time has come to die.

Mr. Wigg recalls an interesting experience he had in Southern Rhodesia, when a vast sepulchre of wild life was shown him by the Chief Nog of Southern Rhodesia.

They passed down a valley in which there were neither trees nor birds nor any life whatsoever. Utter stillness reigned.

The end of the valley was closed by a jagged, weather-worn curtain of conglomerate and on a ledge some ten feet above the floor on the valley was the entrance to a cave, the centre of which was cleft by a big fissure.

Huge boulders of conglomerate disintegrated from the softer sandstone formed niches and minor caves and galleries.

Every inch of the ledges was covered by the remains of animals, while a pit was filled high with thousands of skeletons of all the big buck and elephant, rhino and buffalo in all stages of "dry" decay.

Mr. Wigg had apparently found "the place where elephants die," of which much of a legendary nature has been said and written.

A Divorce Granted

After many years of patient suffering, you can be divorced from corns, you can get rid of them completely by applying Putnam's Corn Extractor. This wonderful old remedy acts in 24 hours and never fails. Refuse a substitute and remember "Putnam's" is the only Painless remedy. 25c everywhere.

Arabs Discovered Alcohol

Alcohol was first distilled by the Arabians, and when we talk about coffee and alcohol we are using Arabian words.

For Frost Bites and Chills.—Chills come from undue exposure to slush and cold and frost bite from the icy winds of winter. In the treatment of either an excellent preparation is Dr. Thomas' Electric Oil, and relieves the pain. The action of and relieves the pain. The action of the oil is prompt and its application is extremely simple.

Worth Noting

A gift of \$3 in Roumanian money was recently received from children of a village near Bucharest, sent to "aid the children of families made destitute by the destruction of the Knickerbocker Theatre, Washington, D.C." To children with their limited outlook, the Knickerbocker disaster appeared something which affected the whole American people, and since they had been helped by American children they wanted, out of their limited means, to give help in return.—Christian Science Monitor.

More Digestible

Natives of the countries in which bananas grow always scrape off the mealy coating before eating the fruit. Physicians say bananas are much more digestible this way.

SAYS SHE FEELS IT IS HER DUTY TO TELL FACTS

Winnipeg Resident Gains 12 Pounds and Hasn't a Trace Of Indigestion and Nervousness Left—Says Tanlac Will Help Anybody.

"It is wonderful what Tanlac did for me and I feel it my duty to tell about it for the benefit of others trying to find a medicine for their troubles," said Mrs. C. Clifford, 625 Langside Ave., Winnipeg, Man.

"Five years ago I had a nervous breakdown and since then I have suffered terribly from dyspepsia and constipation and was in a general run-down condition. My head hurt so bad at times it seemed it would split open and I never ate a meal without having awful pains and bloating of gas that kept me perfectly miserable for hours. I could scarcely eat anything, lost weight, and was so nervous I never could get a good night's sleep.

"Tanalac made me gain twelve pounds, I never have indigestion any more and my nerves are in fine condition. I believe Tanlac will help anyone suffering like I was, and I shall always recommend it."

Tanalac is sold by all good druggists.

More Peril on Ground

Statistics Show More Infantry Officers Killed Than Airmen

There was less danger of death in the late war to officers who fought in the air than to those who combatted on the earth. French statistics show that 29 per cent. of infantry officers were killed, while only 21 per cent. of aviation officers lost their lives.

The fatalities among officers in general as compared to enlisted men in all branches were nearly equal, being 19 per cent. for the former and 18.5 per cent. for the latter.

The percentage of losses by age show that the 20-year-old soldiers, both officers and men, suffered the most. Here the death list was 29.2 per cent., while men from 45 to 50 years old lost in killed between 3 per cent. and 5 per cent. of their numbers.

YOU CAN BE WELL

You can be free of coughs and colds—free of stomach trouble, indigestion and constipation—free of pimples and boils—free of headaches and nervous spells—only if you use **PERU-NA**.

Practically every ordinary ailment comes from a catarrhal condition of the membranes—and **PERU-NA** will always restore the membranes to a healthy, vigorous condition. **PERU-NA** has been making people well and keeping them well, for 100 years and more. Thousands and thousands owe their continued good health to this wonderful home remedy.

Try it yourself. Sold everywhere. Get a bottle today.

Royal Welcome To Prince Of Wales On Return To England

London.—England gave an affectionate and joyous welcome to the Prince of Wales upon his return from his third imperial tour of the world. London, which he left eight months ago, greeted him with a fervor and spontaneity befitting a royal ambassador of the Empire returning from a series of diplomatic triumphs.

Through his half-hour ride from Paddington Station to Buckingham Palace, the Prince was acclaimed by jubilant crowds, who showered upon him salutations of affection and loyalty. Although he had been the recipient of endless stirring ovations on previous occasions, the Prince was profoundly affected by London's ringing welcome his pride and gratitude showing through tears of joy.

The Prince's reception by London's millions was exceeded in depth and emotion only by the ardent family greeting when he stepped from the train. The King grasped him by both hands and the Queen embraced him with motherly affection. Princess Mary who was married during his absence, discarding stilted royal decorum, threw both arms around him, and hugged him. Dowager Queen Alexandra and other relatives embraced him. The Prince's greeting to Viscount Lascelles, whom he met for the first time, consisted of a formal handshake, with no effort at conversation.

Observing the Prime Minister among the group of cabinet members, generals and ambassadors, the Prince advanced rapidly and greeted him effusively. Mr. Lloyd George returned the salutations with vigorous congratulations at the success of the Prince's tour.

After the Prince had shaken hands with the members of the cabinet and inspected the guards of honor with the King, a choir in the station sang, "God Bless the Prince of Wales," the tuneful strains of the popular melody resounding throughout the great glass-covered railway terminal. The Prince then entered an open carriage with the King and his two brothers.

Cyclone in Mossbank District

Windstorm Causes Considerable Damage to Farm Property

Regina.—A cyclone from the southeast travelling northwest struck Mossbank district and did damage which will run high.

The farm buildings on the farm of John Ireland, including garage, granary, large barn 36 by 70 ft., were reduced to kindling, all the outbuildings have disappeared and the roof of the kitchen is nowhere to be found. The family took refuge in the cellar.

An automobile, wagons and machinery were twisted into junk. One of Mr. Ireland's cows was taken up in the air and in falling some distance away was killed.

On the farms of Peter Horn, Herb Payne and Josiah Ireland, granaries, barns and outbuildings were blown to pieces and completely destroyed.

For a time Mossbank people watched the funnel shaped cloud which came within one mile from town near the Elmer Wighton farm. Here it raised and divided, descended in all its fury on the farm of John Ireland. A heavy rain and some hail fell following the cyclone.

British Officials to Aid in Trial

Newark, N.J.—British officials will aid in the prosecution of Colonel Marcellus H. Thompson, and others indicted on a charge of conspiracy to ship arms to Ireland, Assistant Federal Attorney Pearce announced.

The trial will be during the September term of the Federal Court.

Every dollar spent in your home town is a boost for the community.

Problem of Returned Soldiers

Widening of Scope of Royal Commission Agreed Upon

Ottawa.—Problems of the returned soldier were discussed in the House recently. The discussion arose on a motion for concurrence in the report of the special committee on pensions and re-establishment, which was adopted without division.

Herbert Marler of St. Lawrence-St. George (Montreal) Chairman of the Committee, related at length its activities and its findings. He emphasized the great debt of Canada to the returned men but observed, too, that they were also citizens of Canada and on them devolved the duties of citizenship. And following Mr. Marler, Alfred Speakman, of Red Deer, Chairman of the Sub-Committee on Land Settlement, reviewed what was proposed in the way of assistance to soldier settlers on the land. The aim of the scheme was sound, he asserted. The difficulty lay in changed economic conditions.

Subsequently came criticisms, J. T. Shaw (Progressive, Calgary West)—himself a war veteran—had an amendment to extend the scope of the royal commission, proposed to investigate G.W.V.A. charges against the Pensions Board. Under Mr. Shaw's amendment the commission would have power to make a complete survey of existing re-establishment needs, and to investigate the questions of exchange and canteen funds. Mr. Shaw regretted that the special committee had made no definite proposals in regard to unemployment. He criticized limitations placed on returned soldiers' insurance.

From other members also came pleas that the scope of the proposed royal commission should be extended.

Mr. Marler eventually agreed to a widening of the scope of the Royal commission, but declared that the provision to investigate "exchange" matters would entail a great deal of expense. He suggested that the clause be dropped. Mr. Shaw withdrew his amendment on this understanding.

Questions Government On Empire Wireless

British M.P. Asks Relationship of Canada to Plan

London.—In the House of Commons, P. A. Hurd, Coalition Unionist, asked whether the conference with the Canadian Government regarding an empire wireless chain, which was announced more than a year ago as about to take place had yet been held, and what was Canada's relationship towards the British post office's wireless scheme.

Rt. Hon. H. P. Pease, Assistant Postmaster-General, replied that informal conversations only have so far taken place, but he added, the Canadian Government would shortly send two technical representatives to discuss the whole subject with the British Government. After discussions it would be possible to describe the relationship of Canada towards an empire wireless chain.

A Hundred Dollars Worth For Thirty-Five Cents

When you are awakened from a sound sleep by cramps, when without a moment's warning pain springs upon you, it's then you would readily pay a hundred dollars for the quick relief you could secure from a thirty-five cent bottle of trusty old Nerviline. Nothing like Nerviline to relieve cramps, stomach gas diarrhoea and kindred ills. Nothing better for Neuralgia, cold in the chest and sore throat. The price of Nerviline is thirty-five cents, no more, no less, in all stores where medicines are sold.

Dr. Sun Yet Taken Prisoner

Peking.—Dr. Sun Yet Sen, formerly president of the South China republic, has been taken prisoner by the united China forces and is being held captive on the Chinese cruiser Hal-Chi, in the West River near Canton, according to advices received by the foreign legations here from Canton.

Stanley C. Ward, Editor of The Herald, Morris, Man.

Practice of Conferring Titles

Appointment of Committee to Consider Question in Britain

London.—Fifteen members of the House of Commons have agreed to support the submission of a motion for the appointment of a select committee to consider the system under which honors are conferred, the idea being to discover what changes, if any, are necessary to ensure that honors shall be given only as awards of public service.

Questioned in the House on this matter, Right Hon. Austen Chamberlain, Government leader, said the present practice was for recommendations to be sent direct to the Premier by the different governmental departments.

Joseph Devlin, M.P. for Falls, Belfast, asked: "Will Mr. Chamberlain state what is charged for a baronetcy and what price has to be paid for knighthood?"

There was no answer to this question.

COULDN'T DO HOUSEWORK, HEART WAS SO BAD

Many women get weak and run down and unable to look after their household duties owing to the heart action becoming impaired or the nervous system unstrung.

Nature intended women to be strong, healthy and happy instead of sick and wretched. But how can a woman be strong and healthy when day in and day out she has to go through the same routine of work, sweeping, dusting, cooking, washing, etc. Is it any wonder that the heart becomes affected and she gets irritable and nervous, has hot flushes, faint and dizzy spells, smothering and sinking spells and can't sleep at night.

To all women whose heart is weak and whose nerves are unstrung we would recommend

MILBURN'S

HEART AND NERVE PILLS

as the best remedy to tone up the system and strengthen the weakened organs.

Mrs. Daniel Bezanson, Loganville, N.S., writes:—"As I was troubled with a weak heart for nearly two years I am writing to tell you what your great remedy, Milburn's Heart and Nerve Pills, has done for me.

My heart was so bad at night I could not sleep, I would take smothering spells, and was so weak I could not do my housework. I tried two doctors, but got no results. A friend advised me to try your pills. I used six boxes and am completely relieved. I think they are the best remedy for heart trouble there is."

Price, 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Germans Attack French Soldiers

Coblentz.—The United States and French military police are investigating an attack by German civilians on two French soldiers who were returning to their barracks near Bernsdorf. The soldiers were roughly handled, their injuries requiring hospital treatment.

Receives Honorary Degree

Ottawa.—The honorary degree of doctor of laws has been conferred on Hon. W. F. Alphonse Turgeon, former Attorney-General of Saskatchewan and judge of the Court of Appeal of that province, by the University of Ottawa.

Eczema You are not experimenting when you use Dr. Chase's Ointment for Eczema and Skin Irritations. It relieves at once and gradually heals the skin. Sample box Dr. Chase's Ointment free if you mention this paper and send 2c stamp for postage. 50c a box; all dealers or Edmundson, Bates & Co., Limited, Toronto.

Irish Republicans Express Regret Over Results Of Elections

To Amend Immigration Act

Discussion in Ottawa House Over Woodsworth Bill

Ottawa.—The House concurred in the report of the special committee on the Woodsworth Bill to amend the immigration act in regard to deportation and other provisions inserted during the stormy days of the Winnipeg strike in 1919. The committee, while recommending that the Woodsworth bill should not be proceeded with this session, advised three changes as preparatory to a general revision of the act.

The committee's report, however, did not find favor with Mr. Woodsworth, who represents Winnipeg Centre in Labor interests. He objected to it on the ground that it did not go far enough; that under one of its proposed amendments of the Immigration Act the Minister of Immigration could order the deportation of a member of the House born outside of Canada who objected to its policies. He moved in amendment that no person should be deported for any political offence committed in Canada without being granted trial by jury.

Hon. Charles Stewart, Minister of the Interior, thought the amendment would throw the gate open wide. It was defeated by a large majority.

Holland Given Presidency

M. Paton Elected Head of Commission On Russian Affairs

The Hague.—Holland was assigned the presidency of the central commission of the conference on Russian affairs here when the selection of the heads of this commission and the three sub-commissions of the conference was made. Belgium was given the vice-presidency of the central body, while representatives of Great Britain, France and Italy respectively head the three sub-commissions. The list announced was:

M. Paton, Holland, President Central Commission.

M. Cattier, Belgium, Vice-President.

M. Alphonse, France, Chairman of Sub-Commission on Debts.

Baron Avezzano, Italy, Chairman of the Sub-Commission on Credits.

Sir Phillip Lloyd-Graeme, Great Britain, Chairman of the Sub-Commission on Property.

Spokesmen for the nations forming the Little Entente let it be known that they were not entirely satisfied with the announced idea of having the four presidents form a steering committee for the conference. They voiced their apprehension that the Big Four thus created would practically dominate all the negotiations with Russia. If this proved to be the case they favored increasing the membership of the steering committee so as to include others besides the heads of the commissions.

Stepping from Moving Train Illegal

Toronto.—The attention of the travelling public is called by the judgment of the appellate division given to the fact that it is contrary to law to step from a train while it is in motion. The court allows the appeal of the Grand Trunk Railway from the decision of Judge Huycke and a jury awarding Mrs. E. M. Hill, of the village of Hastings, \$175 damages for a sprained ankle. Her action is dismissed with costs.

Says Britain's Air Defense Inadequate

London.—The outcry of certain newspapers with regard to the inadequacy of Great Britain's air defense was reflected in the House of Commons when Major-General Seeley declared that the Royal Air Force reserve to be provided by civil aviation had almost entirely disappeared. Consequently, he said, the British defensive power in the air was dangerously low.

Manitoba Elections

Brandon, Man.—The Manitoba general election will likely be held on July 21, one month from today, it was indicated by Premier T. C. Norris, when speaking at a meeting here.

Dublin.—The results of the elections give a substantial majority to the pro-treaty element. The republicans are generally surprised and disappointed over the results but assert that these were due to the defective register, and they anticipate a more successful fight on the new suffrage comprising adults of both sexes. Labor's evident opposition to them would appear to negative this hope, but they expect friction over the constitution between the Labor members and the treaty party.

A majority of the joint Sinn Fein is not in doubt. If they agreed they would outnumber all the others by nearly 40, but the prospects of an agreement are disappearing and the division of the Dail now seems more likely to follow the essential division between those who support and those who oppose the treaty. On both sides there is pessimism as to the possibility of forming a coalition.

Mr. De Valera made this announcement to newspaper representatives seeking a statement on the results of the elections. He said:

"These results seem indeed a triumph for the Imperial methods of pacification—outrage, murder and massacre, and then a threat with a concession, the policy of a kick and a caress, with a kick in reserve.

"By the threat of immediate renewal of the infamous war, our people, harassed and weary and fearful of chaos, have in the majority voted as England wanted, but their hearts and their aspirations are unchanged, and Ireland until free, will never be at rest or genuinely reconciled with England. England's gain is for the moment only, and England's difficulty will still be prayed for as Ireland's opportunity."

As for the published constitution, Mr. De Valera said it was only a draft and he felt confident that the Dail would not pass it as it stands. "As it stands," he said, "it will exclude from public service and practically disfranchise every honest republican."

Trade Revival Only Remedy

British Government Cannot Advance Further Sums for Unemployed

London.—Premier Lloyd George received one of the largest deputations at No. 10 Downing Street, which has ever attended at the Premier's residence, it comprising 126 persons, including some sixty members of the House of Commons, who appealed on behalf of the Boards of Guardians, which are in grave financial straits, owing to the heavy calls for unemployment relief. The Premier, while expressing sympathy, said he could not ask the House of Commons to sanction an increase for the Boards of Guardians for unemployment relief based on local taxation. The only remedy he could see for the present unfortunate condition was a revival of trade.

India Sends Message to Prince

London.—The Viceroy and Governor-General of India, the Earl of Reading, has cabled a message to the Government and the Prince's people in India, rejoicing that the Prince has safely reached the end of his long journey.

Sofia, Bulgaria.—Ten thousand persons have been rendered homeless by devastating floods which inundated the suburban districts of Sofia following torrential rains. No loss of life has been reported. There was much damage to livestock.

Victoria—Joseph Sears, pioneer merchant of this city, who came to Victoria in 1860 from Boston, Mass., died here June 20. He attended the first school opened in British Columbia.

Radio Activities Due To Revolutionize Many Phases Of Life In Canada

The radio fever, which has so violently attacked all sections of the United States, has not been halted by the boundary between that country and Canada, and the epidemic has swept the country from coast to coast in the same novel and rapid manner. The general public, made cognisant with the fact that the wonders of wireless, hitherto surrounded with the mysteries of technique, are within its power to utilize and enjoy, has entered eagerly and enthusiastically into the studio of radio. Judging by the manner this method of communication has appealed to the business and entertainment of Canadians already, radio is due to revolutionize many phases of Dominion life. Railways, newspapers, pleasure resorts, theatres, business houses and thousands of private individuals are installing radio outfits, and Canada has proved no laggard in keeping in step with this particular line of progress.

Previous to the general interest awakened in radio in this country, wireless was fairly extensively used in the Dominion in numerous lines of operation. A very fine service was built up by the forestry service of British Columbia as part of its precautions against forest fires and to keep rangers in instant touch with each other and with headquarters. Several pulp and paper companies have had communication between the limits and city headquarters by wireless. Excellent results have been achieved with the use of radio in the fishing industry especially in the annual seal hunt off Newfoundland coasts, when the work of aviators flashing back the location of seal herds has proved invaluable and resulted in much larger catches being made in infinitely shorter time.

In the new wave wireless interest which has swept over the country, radio associations have been formed in every section where, through co-operation, wireless entertainment is provided and the intricacies of radio studied. Organizations have sprung into existence all over for the manufacture of apparatus and the operation of stations. Demands are being made for the greater commercial use of radio, and projects under way are calculated to provide this within a short time. Recently the Maritime Radio Corporation was incorporated at St. John, N.B., to engage in the radio telegraph business and operate both sending receiving stations as well as to sell equipment for same. A similar company has been organized at Vancouver, at the other extreme of the continent; at Winnipeg a five million dollar company has been incorporated with the same objects; three companies have been incorporated in Edmonton, Alberta; whilst in between in the various provinces, companies are in the process of formation for the object of promoting the work of wireless.

Indications are that the new interest in wireless will bring about an extension of the systems prevailing for the protection and development of various Canadian natural resources. The splendid aid of wireless in forestry has been ably demonstrated in British Columbia, and now it is intended to install two radio stations in Manitoba for the use of forest aeroplane surveys in the province. This entails also the equipment of the flying boats in operation with wireless outfits. Their main work will be that of reporting fires and enabling fighting parties to be transported to the burning areas without loss of time, as well as in sending authentic weather reports from the north country.

The commercialization of radio telegraphy should be greatly facilitated in the Canadian western provinces from the fact that the telephones are owned and operated by the various Provincial Governments, thus making it a convenient extension to bring the radio systems under the one control. The province of Manitoba is to take the lead in this regard, according to announcement, and enter into the radio broadcasting business at an early date on a commercial basis.

The first passenger train in the Dominion of Canada to be equipped with a radio apparatus was a Canadian Pacific Railway local out of Winnipeg.

This was the Livestock Improvement Special of seventeen cars which left during May, to tour the province of Manitoba under the auspices of the railway and Federal and Provincial Departments of Agriculture to promote better farming methods. Two Marconi representatives and a mechanic accompanied the train, and demonstrations were given each day, the feature being greatly appreciated by those who attended the lectures given and heard concerts and general world news from Winnipeg.

In the words of a noted Canadian authority "Radio is here to stay and it is going to become a part of our everyday life." Already it has penetrated nearly every phase of Canadian life and Canada has exhibited the spirit of progress and initiative which instigates her in all things in losing no time in entering zealously into the new radio enthusiasm and suiting the system to her peculiar needs. Through new legislation it is now necessary for every person operating a receiving equipment in Canada to secure a license from the Dominion Government at a fee of \$1.00 per year. All nationality restrictions in connection with radio receiving licenses have been cancelled, and any person irrespective of nationality may obtain a receiving license. A restriction limiting the issue of transmitting licenses to British subjects remains in force. In September next a Dominion-wide radio convention will be held at Toronto, bringing together the leading figures of Canadian radio circles, as well as many United States experts. Much has already been done, and much will yet be done before the convention sits, at which a fine record in Canadian radio achievement may be expected.

Gems With Magic Power

Belief in Uncanny Influence of Precious Stones Not Uncommon

Do you believe in the magic powers of precious stones? It is a belief dating back to the ancients that the gift of eloquence is bestowed by the sardonyx, and Disraeli wore a ring set with this jewel upon all occasions when he wished to electrify auditors and win new adherents to his cause says Tit-Bits.

A certain Royal Princess wears a ring set with jet as one of her talismans. It is supposed to possess singular efficacy in preserving health. The ancient theory regarding jet was that if powdered and mixed with wine it was a sovereign remedy for toothache.

The Shah of Persia is never without his cube of amber, which he wears around his neck. It is said to possess the power of rendering its wearer invulnerable.

The late Czar of Russia wore a ring in which he believed was embedded a piece of the true Cross. Once while travelling from Petrograd to Moscow he found that he had forgotten his ring. The train was stopped and a messenger was sent back for it. Then there is "the ring for death" in Spain. This fatal ring hangs about the neck of the patron saint of Madrid in one of the most beautiful parks of the Spanish capital. It is of pearls and diamonds, but there is no special provision made for watching it, as the Spaniards prefer to give it a wide berth.

The story of the ring is a tragic one. It was made for the father of the present King, and he presented it to Mercedes upon the day of their betrothal. Her married life was short. Queen Christina, the King's grandmother, next wore the ring. She died shortly after, and the King gave it to his sister, Infanta del Pilar, who died within a month.

It then passed to a daughter of Duc de Montpensier, and in less than three months, she, too, died. The King, fearing its influence, put the jewel in his own treasure box. Before the year was out he died.

Curious to Know

"An' about the sun an' moon an' stars bein' million an' millions o' miles away—I wisht you'd tell me who went an' measured, an' what he stood on while he done it."—New York Sun.

Britain's Position Defined

Cannot Carry on Much Longer Without Foreign Markets

For her welfare, indeed for her very life, England must have markets—markets in which she may buy raw materials to feed her mills and in which she may sell their product. Three or more million English workmen are idle and supported by doles from the Government. Property is being taxed to the point of destroying its value. The country is suffering for that which would be supplied by revival of trade with Germany and Russia.

On the other hand, France wants protection. Fear of her neighbor beyond the Rhine has been bred into her. Her imperative need is security. In a sense she is better off than England, for she can sustain her own people from her own soil; but in another sense she suffers by comparison because of her exposed position toward an embittered and revengeful enemy whose potential powers are vastly greater than her own.

A course towards Germany and Russia that would serve the interest of England would, in the view of French statesmen, be fatal to the interest of France. England cannot much longer carry on without the markets of Germany and Russia. Under ideals and motives that are inbred, France will not abandon her fears.—From the Argonaut.

New Air Boat

Improved Type of Machine for Cross Channel Mail Service

A new type of flying boat with seating capacity for six passengers and fitted with Rolls-Royce 375 horsepower engines, is being built for the Cherbourg-Southampton passenger and mail air service, which will be started in September to connect with trans-Atlantic steamers.

It is claimed that flying boats passing over sea need not attain the altitude necessary in overland or cross-channel flying, and that they possess additional advantages. A significant fact is that insurance premiums on the flying boats are only half those charged on air lines between London and Paris.

Lend Encouragement To The Work Of Promoting Technical Education In Canada

The World Debt

New York Bank Estimates Different Nations' Percentage

It has been estimated by one of the New York banks that as the world debt now stands, France will require upward of 40 per cent. of her people's total peace time income, as that income was formerly figured, to meet the interest obligations and upkeep expenses of the nation. Great Britain will require 28 per cent. Russia, when obligations ultimately are honored, will apparently require more than 45 per cent. of her people's income, as that was figured prior to the war. Before making any indemnity obligations, Austria-Hungary will require 48 per cent. and Germany 31 per cent. The taxes of the United States for the same purpose will be a little better than 5 per cent., and Italy 26 per cent. Figured another way, if the individual's income were turned over to the government to defray expenses the American would work fifteen days to pay his government tax; the Englishman would work 84 days; the German 90 days; the Frenchman 120 days; and the Russian and Austrian would have to do even better than that. This makes no allowance whatever for the repayment of principal and takes account only of carrying and upkeep charges.—Farm and Ranch Review.

Geologists for Far North

Following out a vigorous campaign inaugurated last year, the Federal Government is sending out parties of surveyors and geologists into the far north to map out the country and to ascertain its resources. One party will go right through to the delta of the Mackenzie River and will winter on Herschell Island.

Give your local merchants a chance. Buy at home.

Stella Tells Her Brownies About Hermit Crabs.

"WON'T you tell us some more about the under-the-ocean world?" Pimkie asked the Wishing Fairy one day when they were all heartily tired after ever so many games of leap frog and hide-and-go-seek far away, at the End-of-the-Earth. "I simply love to hear about it, for even though it is in a sense another world it somehow seems too strange and wonderful to be quite true."

"I suppose," Lorykins added thoughtfully, "that is the reason we enjoy hearing about it so much. It is like a make believe story. It is very easy to grow tired of the things one is used to, and heaven knows—at least I know—that I could never become used to those awful creatures that I ran into the day you changed us Brownies into four Shrimp and took us on our trip under the sea to visit your mermaid cousin. Oh, will I ever forget that dreadful Shark who frightened me out of my wits and—"

"And you haven't much to boast of," exclaimed Pimkie. His words were rude, but as long as he smiled when he said them Lorykins forgave him and continued:

"And that ghastly Hammerhead Fish who glared at me—with his big eyes! No, I'll never never, never forget him!"

"Yes, Stella, it certainly was awful," said Pimkie; "but, just the same, tell us of some more undersea creatures. I just love to hear of horrors!"

"But they are not all 'horrors,' as you call them; for there are ever so many that are amusing and harmless. Do you know what a hermit is?"

"Yes," answered Kinkajou joyously, for he was glad that he could answer his beloved Fairy's question. "I know. A hermit is one who lives all by himself—doesn't like company, and all that sort of thing."

"Good!" exclaimed Stella. "Then you can imagine what a 'Hermit Crab' is."

"Of course," laughed the Brownie, "it must be some kind of a crab that lives all by itself. Its very name tells that!"

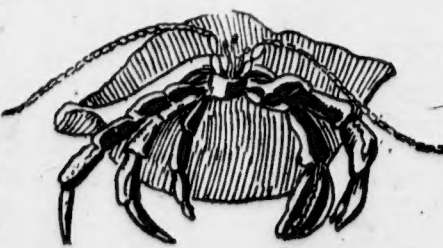

"You are quite right," the Fairy answered, "and as soon as you know what the Hermit Crabs do you will want to go to some nice quiet place on the shore and watch them. It's lots of fun. I myself have spent hours studying them."

"Tell us about them," Kinkajou eagerly requested.

"Well," answered the Fairy, "a Hermit Crab isn't exactly a real Crab, for it doesn't look like the general lot of them, even though it has lots of legs and a very strong 'pincher claw.' To begin with, it is very small, though it has a fierce, fighting nature."

"What in the world can a Crab find to fight about?" asked lazy Lorykins disdainfully.

"Lots of things," laughed the Wishing Fairy; "for a Crab's life is just as full of Crab interests and hopes and worries as any other creature's; and as for the Hermit Crab—there seem to be even more interests, for it has to hunt around and find the empty shell of a dead Whelk or Snail to serve as its home. This done, it backs up to the chosen shell and ever so carefully pushes its long, naked body down into the entrance. In less than no time it hooks its tall (which is ever so strong) around the innermost curves of its adopted home and hangs its arms out of its new front door and looks around at its little world with a very comfortable and safe feeling. Wherever it goes it carries its tiny shell house along with it and ever so often there are fearful fights to be undertaken with other Hermit Crabs who may like its shell more than their own, and these little Crabs that dart so quickly here and there can fight! They really are very vicious."

Copyright, 1921.

A question affecting labor in Canada is that of technical education. In 1911 the Canadian Government appointed a Royal Commission, which spent two years investigating technical education in North America and Europe, and prepared a definite programme for the development of this work in Canada. Industrial training or technical education as outlined in the report of the commission has for its aim: (1) Preservation of health and the vigor of life; (2) the formation of good habits; (3) the development of the sense of responsibility and duty; (4) the preparation of the body, mind and spirit for following some useful occupation; (5) the cultivation of the mental powers, the acquisition of knowledge and the development of the scientific spirit with direct reference to the occupation; (6) the promotion of goodwill and desire and ability to co-operate with others; (7) the maintenance of standards and ideals; 8) as all-inclusive and ultimate, the perfecting of the human spirit, the improvement of the quality of life itself and the betterment of the conditions of labor, leisure and living.

The war prevented immediate action on the recommendations of the commission, but in July, 1919, the Government passed the Technical Education Act, by which a total of \$10,000,000 is to be granted to the provinces during a period of ten years for the purpose of promoting technical education. This assistance has given a decided impetus to the work and every province is now building new technical schools. The total number operating in the Dominion in 1920 was 139, with an aggregate enrolment of 60,546 students.

These schools conduct courses in every branch of industrial and commercial occupations. Pre-vocational classes prepare juniors for apprenticeship or for regular vocational courses. Part-time co-operative or continuation classes provide special instruction for apprentices and juvenile employees. Evening unit courses are provided for skilled and unskilled workers in all branches of industry who wish to prepare themselves for promotion. Vocational and technical day classes prepare students for employment in industry and for entrance into advanced classes in technical and commercial colleges and universities. Special classes are provided for women and girls. Correspondence courses in mining are conducted in British Columbia, Alberta and Nova Scotia.

The major lines of activity to which the vocational or technical education programme is being adjusted are: (1) Wholesale and retail business, including importing and exporting; (2) banking, brokerage and insurance; (3) metal products—hardware, machines and tools, automobiles, heating and ventilating equipment, electrical equipment, farm implements and machinery, steam power equipment—stationary, marine and locomotive—and railroad equipment; (4) wood products—buildings, furniture, pulp and paper, farm equipment, vehicles and automobile bodies; (5) mining—coal, gold, silver, copper and nickel; (6) railroad operation—apprentices, shopmen, trainmen, engineers, telegraphers; (7) marine engineering and navigation; (8) stationary steam engineering and steam plant operation; (9) hydro-electric power plants—transmission of electrical energy for lighting, heating, street and inter-urban electric railway purposes; (10) home-making and wage-earning occupations for girls and women; (11) the skilled and semi-skilled trades; (12) agriculture; (13) municipal, provincial and federal Civil Services.

Vocational schools are controlled by Advisory Committees of the Municipal Boards of Education, consisting of representatives of the board, of employers and of employees. The courses of study are organized to meet the needs of each community—industrial, agricultural, or whatever they may be—and new courses are added as occasion demand. The point of most significance to the manufacturer is that the Advisory Committee co-operates with local industries in providing the most beneficial type of instruction to all classes of workers.

\$2,000 in cash prizes

Many people have discovered that 2 in 1 Shoe Polishes are good for other things than for shining shoes. For example:—

- 2 in 1 BLACK—Good for polishing motor cars; refinishing suit cases, kodaks, black gloves, rubbers, hats, etc.
- 2 in 1 WHITE—cake or liquid—Good for cleaning hats, stains in white skirts, white kid gloves, auto tires, etc.
- 2 in 1 TAN PASTE—Good for polishing furniture, hardwood floors, etc.

For the Best List of New Uses for 2 in 1, We are Awarding Cash Prizes as Follows:

1st award \$500.00—for the most acceptable list	20 Prizes of \$15.00—for the next twenty
2nd " 300.00—for next best list	50 " " 5.00—for the next fifty
3rd " 200.00—for third best list	50 " " 2.00—for the next fifty
10 Prizes of 25.00—for the next ten	100 " " 1.00—for the next 100 lists

Try to find new uses for any of the 2 in 1 Shoe Polishes, either black, tan, oxblood, or brown paste, white cake or white liquid, black or tan combination.

2IN1
Saves You Money

Write on one side of paper only. List uses according to colors. Awards will be made according to decision of special committee, and payment made on or before October 1st, 1922. All lists submitted to become our property. Address:

Prize Editor,

HAMILTON, CANADA.

WORLD HAPPENINGS BRIEFLY TOLD

Admiral Sir Lewis Beaumont, retired former first lord of the admiralty and high commissioner to Egypt, died June 19.

More than a million feet of standing timber, poles and posts valued at \$9,000 have been destroyed by bush fires on the Arrowhead branch of the Canadian Pacific Railway.

In order to avoid the perils of anthrax, the United States Government has passed a bill prohibiting importation and interstate commerce in brushes made of horsehair.

The British Government has informed the Egyptian Government that the preferential treatment heretofore accorded Egyptian products passing their customs has been abolished in consequence of Egypt's new status.

Sixty thousand people passed the coffin of Lieutenant Bennett, the airman who was killed at the same time as Sir Ross Smith, who met an accidental death in England, as the body lay in state in Queen's Hall in the Parliament House, Melbourne.

Foot and mouth disease has again broken out among animals in England, this being the worst outbreak yet reported to the Board of Agriculture. The peak has occurred in the Derbyshire area, where over 100 animals have been certified affected by the disease.

To Run Down Criminals

Seventy-two high-powered passenger automobiles are operated by the police department in 72 precincts of New York, to rid the city of all persons or convicts and others suspected of violence or of crime. Each of the police cars will be constantly on patrol.

Yarmouth, N.S., March 24, 1921.

The Secretary of the Yarmouth Athletic Association, who were the champions for 1920 of the South Shore League and Western Nova Scotia Base Ball, states that during the summer the boys used MINARD'S LINIMENT with very beneficial results, for sore muscles, bruises and sprains. It is considered by the players the best white liniment on the market. Every team should be supplied with this celebrated remedy.

(Signed) JOSEPH L. LeBLANC,
Sec'y Y. A. A. A.,
Champions N.S. South Shore League, 1920.

A full-sized model of Westminster Abbey was specially erected near Berlin recently for the purposes of a motion picture production.

Corns are caused by the pressure of tight boots, but no one need be troubled with them long when so simple a remedy as Holloway's Corn Remover is available.

Haydn was one of the most eccentric of the great musicians. In the dead of night and in the seclusion of his own study, he invariably sat down to work in full court dress—sword, laced hat, silk stockings, etc.

Scientist Makes Discovery

Dr. Owens Says Dust Is From Other Worlds

The dust which is suspected to have come from other worlds has been discovered floating about over England. In his investigations, Dr. Owens, the adviser on atmospheric pollution to the Meteorological Office, has found some of this dust. Under the microscope the particles look like round, transparent balls of solid matter. It is, of course, possible that they are from some active volcano, but if not volcanic, they must have descended upon the earth from outer space.

Micro-photographs have been taken of this dust, as well as some dust which Dr. Owens believes travelled to this country from Germany. "This German dust," he said, "was blown over the North Sea, and was 'captured' on the east coast.

For Burns and Scalds.—Dr. Thomas' Electric Oil will take the fire out of a burn or scald. It should be at hand in every kitchen so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

The largest car at present used on British railways is less than 60 feet long.

Lake Victoria, in Africa, the second largest fresh water lake in the world, is almost exactly circular.

A NEW FAD.

The eternal feminine who is ever on the lookout for something new, something different, has started a new fad which promises to become very popular. This new fad is the "Portia" costume. Shown here is an illustration which will give you an idea of what this costume is like.

HOW TO BEST TREAT STOMACH TROUBLE

A Tonic Medicine is Needed to Strengthen the Stomach

The old-fashioned methods of treating stomach diseases are being discarded. The trouble with the old-fashioned methods was that when the treatment was stopped the trouble returned, often in an aggravated form.

The modern method of treating indigestion and other forms of stomach trouble is to tone up the stomach and glands to their normal work. The recovery of the appetite, the disappearance of pain after eating, the absence of gas, are steps on the road to health that those who have tried the tonic treatment remember distinctly. Dr. Williams' Pink Pills are a tonic which through their action on the digestive organs, and therefore the best remedy for simple or chronic cases of stomach trouble. The success of the treatment is shown by cases like that of Mrs. Joseph Leclerc, Wellington, P.E.I., who says:—"I have been a great sufferer from indigestion and stomach trouble, and nothing that I took for it did me any good until I began Dr. Williams' Pink Pills. I was so bad that I did not want to eat, and when I did take food it lay like a weight on my stomach, often causing me much pain and misery. I saw in an advertisement what Dr. Williams' Pink Pills had done in a similar case and began taking them, with the result that after taking the pills for five or six weeks, I am feeling better than I have done for years. I hope my experience will help other similar sufferers."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail, post paid, at 50c a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Trade Revival

Canadian Trade is Maintaining Its Upward Movement

Canadian trade maintains its upward movement. For May, the total Canadian trade was \$136,580,094, in comparison with \$129,236,032 of May, 1921. Imports, as compared with May of last year declined about two millions; exports of domestic merchandise improved rather more than nine and a half millions. The greatest increase in exports was in agricultural and vegetable products (mainly foods). In this class, domestic exports totalled \$32,977,039, an increase of nearly eight millions over May, 1921.

Total imports of merchandise in May, 1922, were \$66,121,374; total domestic exports, \$69,146,171.

Varick, an American surgeon introduced the use of cocaine in capital amputations.

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Graves' Worm Extremator.

The largest hanging bell in the world is said to be that in the great Buddhist monastery near Canton. It is 18 feet in height, and 45 feet in circumference, being cast of solid bronze.

Minard's Liniment for Dandruff

SAVED HER FROM AN OPERATION

So Thinks Mrs. Tracey of Ontario, Regarding Lydia E. Pinkham's Vegetable Compound

Knightington, Ontario.—"I took Lydia E. Pinkham's Vegetable Compound at the change of life for troubles that women often have at that time. I had not been well for a year and was not really able to do my work. A friend who had taken the Vegetable Compound herself recommended it to me and I think its use saved me from an operation. I highly recommend it to all women who have troubles like mine, and am willing for you to use my testimonial."—Mrs. DANIEL J. TRACEY, Knightington, Ontario.

Some female troubles may through neglect reach a stage when an operation is necessary. But the more common ailments are not the surgical ones; they are not caused by serious displacements, tumors or growths, although the symptoms may appear the same. When disturbing symptoms first appear take Lydia E. Pinkham's Vegetable Compound to relieve the present distress and prevent more serious troubles.

Aged one hundred, an Austrian burglar was recently arrested in an uninhabited house, where he had lived for a fortnight, drinking the wines in the cellar.

After 10 Years of Asthma Dr. J. D. Kellogg's Asthma Remedy proved the only relief for one grateful user, and this is but one case among many. Little wonder that it has now become the one recognized remedy on the market. It has earned its fame by its never failing effectiveness. It is earning it today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

It is necessary for telephone operators in Egypt to be able to speak English, French, Italian, Greek and Arabic.

Financial Strength

THE principles upon which a Bank is founded, the number of years it has been in operation, and the policy followed during these years—these features, combined with its present standing, from the criterion of the strength of a Bank.

The Bank of Montreal began business in the year 1817 with a modest capital of \$350,000, and for over a century it has followed a conservative—aggressive policy until to-day its capital and reserve fund total \$54,500,000 and its total assets are in excess of \$650,000,000.
